How will your state vote?

Predicting a vote is a challenging task. Political researchers have different opinions on how to predict an election outcome. Different formulas and methods are used, however none is perfect. Each prediction is a snapshot of the voters' opinion at a certain point in time. But with election issues and current events changing so fast, it is quite a challenge to have an accurate prediction of how the election will turn out. In the 2016 election, most political pundits and polls before Election Day had Democratic candidate Hillary Clinton in the lead. Yet, while Clinton won the majority of the popular vote, the Republican candidate Donald J. Trump won the Electoral College votes of key swing states and thus the Presidency.

What are the most common predictors to determine how citizens will vote? Socio-economic factors are among the most important ones. They include, but are not limited to, citizens' education, income, and ethnicity. While these are often mentioned as decisive, others are important to consider as well. For example, many Americans cast their vote based on a single issue like health care, women's reproductive rights, the economy, or the environment. These voters choose their preferred candidate based on the issue most important to their identity, their social network, or personal biography, for example religious affiliation, ideology, or health. Americans also often cast their vote in a local context and are influenced by political and social issues affecting their own state. Finally, calculating voter turnout is key to an accurate prediction.

Some key variables for predicting the election outcome

Voting history

How have people in the state voted in the past? Is the state solidly red, blue, or purple? What is the expected turnout?

Ethnicity

What ethnic group does a citizen belong to? What is the ethnic make-up of the state?

Religion

How important is religion to the citizens? How often do they pray or attend worship service?

Economy

What's the current economic situation in the state? How many citizens live in poverty? How many are without a job?

Income inequality

How wide is the gap between wealthy and poor people? How much income does the top 1% in the state take home?

Education

How many people graduate from high school in your state? How many have a college degree?

Voting history ^[2]

The Zia, a Native American symbol for the Sun, features on the state flag and the state has the second-highest percentage of Native American inhabitants in the US.

The state divides politically along geographical lines, with Democrats strong in the more urbanized north and Republicans dominant in the south-east, which borders Texas. New Mexico's large Latino population swung behind Barack Obama in 2008 and 2012, especially after he enacted legislation to protect the children of illegal immigrants. It has participated in 27 presidential elections through 2016, with the results split almost down the middle; 15 for Democrats, 12 for Republicans. However, Democrats have now won 6 of the last 7 elections. This shift is at least partially due to the increasing support of the Democratic party by Latinos in recent years.

Election results in New Mexico (2000–2016):^[3]
