 Population: **7,535,591**
 Nickname: **"Evergreen State"**
 State motto: **"Al-ki" ("Bye and Bye")**
 Governor: **Jay Inslee (D)**
 U.S. Senators: **Patty Murray (D),
Maria Cantwell (D)**

How will your state vote?

Predicting a vote is a challenging task. Political researchers have different opinions on how to predict an election outcome. Different formulas and methods are used, however none is perfect. Each prediction is a snapshot of the voters' opinion at a certain point in time. But with election issues and current events changing so fast, it is quite a challenge to have an accurate prediction of how the election will turn out. In the 2016 election, most political pundits and polls before Election Day had Democratic candidate Hillary Clinton in the lead. Yet, while Clinton won the majority of the popular vote, the Republican candidate Donald J. Trump won the Electoral College votes of key swing states and thus the Presidency.

What are the most common predictors to determine how citizens will vote? Socio-economic factors are among the most important ones. They include, but are not limited to, citizens' education, income, and ethnicity. While these are often mentioned as decisive, others are important to consider as well. For example, many Americans cast their vote based on a single issue like health care, women's reproductive rights, the economy, or the environment. These voters choose their preferred candidate based on the issue most important to their identity, their social network, or personal biography, for example religious affiliation, ideology, or health. Americans also often cast their vote in a local context and are influenced by political and social issues affecting their own state. Finally, calculating voter turnout is key to an accurate prediction.

Some key variables for predicting the election outcome

Voting history

How have people in the state voted in the past? Is the state solidly red, blue, or purple? What is the expected turnout?

Ethnicity

What ethnic group does a citizen belong to? What is the ethnic make-up of the state?

Religion

How important is religion to the citizens? How often do they pray or attend worship service?

Economy

What's the current economic situation in the state? How many citizens live in poverty? How many are without a job?

Income inequality

How wide is the gap between wealthy and poor people? How much income does the top 1% in the state take home?

Education

How many people graduate from high school in your state? How many have a college degree?

Voting history ^[2]

The state has gone through periods during which it voted primarily Democratic and other periods where Republicans usually won.

Democrats have been the victors in the last eight elections, making it one of the more reliably blue states at this point in its history. In 2016, Hillary Clinton defeated Donald Trump by a 54% to 38% margin. The state's electoral influence has grown in recent decades; in the western half of the country only Texas and California have more than Washington's 12 electoral votes. In the 2016 election, four of those electors were faithless, with three voting for Colin Powell and one for Faith Spotted Eagle.
