

## Ohio (OH) (18 votes)

Capital: **Columbus**  
 Area: **44,825 sq mi. / 116,096 sq km**  
 Population: **11,689,442**  
 Nickname: **"The Buckeye State"**  
 State motto: **"With God, all things are possible"**  
 Governor: **Mike DeWine (R)**  
 U.S. Senators: **Sherrod Brown (D),  
 Rob Portman (R)**

## How will your state vote?

Predicting a vote is a challenging task. Political researchers have different opinions on how to predict an election outcome. Different formulas and methods are used, however none is perfect. Each prediction is a snapshot of the voters' opinion at a certain point in time. But with election issues and current events changing so fast, it is quite a challenge to have an accurate prediction of how the election will turn out. In the 2016 election, most political pundits and polls before Election Day had Democratic candidate Hillary Clinton in the lead. Yet, while Clinton won the majority of the popular vote, the Republican candidate Donald J. Trump won the Electoral College votes of key swing states and thus the Presidency.

What are the most common predictors to determine how citizens will vote? Socio-economic factors are among the most important ones. They include, but are not limited to, citizens' education, income, and ethnicity. While these are often mentioned as decisive, others are important to consider as well. For example, many Americans cast their vote based on a single issue like health care, women's reproductive rights, the economy, or the environment. These voters choose their preferred candidate based on the issue most important to their identity, their social network, or personal biography, for example religious affiliation, ideology, or health. Americans also often cast their vote in a local context and are influenced by political and social issues affecting their own state. Finally, calculating voter turnout is key to an accurate prediction.

## Some key variables for predicting the election outcome

### Voting history

*How have people in the state voted in the past? Is the state solidly red, blue, or purple? What is the expected turnout?*

### Ethnicity

*What ethnic group does a citizen belong to? What is the ethnic make-up of the state?*

### Religion

*How important is religion to the citizens? How often do they pray or attend worship service?*

### Economy

*What's the current economic situation in the state? How many citizens live in poverty? How many are without a job?*

### Income inequality

*How wide is the gap between wealthy and poor people? How much income does the top 1% in the state take home?*

### Education

*How many people graduate from high school in your state? How many have a college degree?*

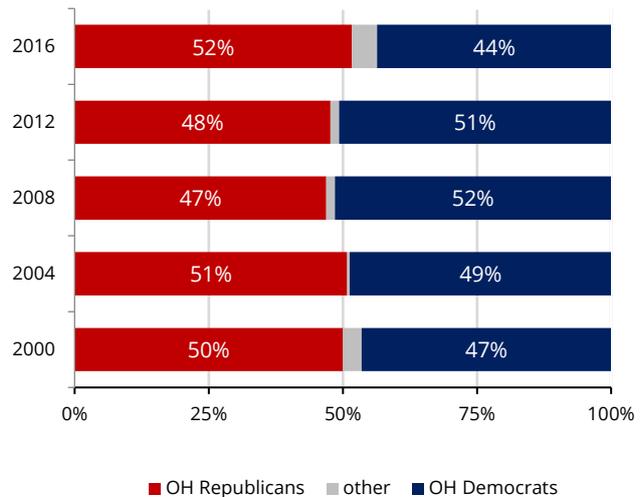

## Voting history <sup>[2]</sup>

The home to seven former presidents, Ohio is sometimes known as the Modern Mother of Presidents.

Ohio has been a major battleground in recent elections due to the closeness of the vote and its wealth of electoral votes. 2016 saw Donald Trump defeat Hillary Clinton by over 8 points, the largest margin there since 1988. In recent elections, the Buckeye State has proved itself to be a remarkably good predictor of the election winner. Since 1944, Ohioans have sided with the losing candidate only once – opting for Nixon over Kennedy in 1960. Ohio has been losing population (relative to the country as a whole) and it has lost about 1/3 of its electoral vote clout since the 1960s. It lost two electoral votes after the 2010 Census and is on track to lose one more after the 2020 presidential election.

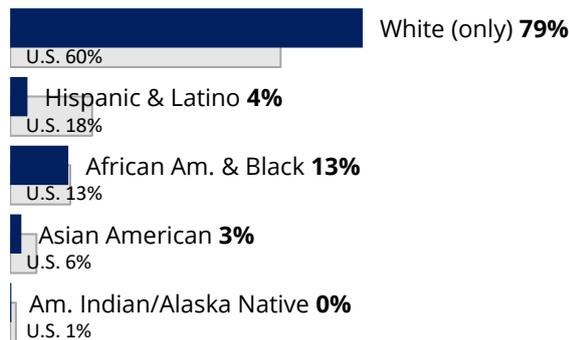

## Election results in Ohio (2000–2016): <sup>[3]</sup>

## Voter turnout 2016:

## Ethnicity <sup>[4]</sup>

(U.S. average in grey)
