

## Vermont (VT) (3 votes)

Capital:	<b>Montpelier</b>
Area:	<b>9,616sq mi. / 24,923 sq km</b>
Population:	<b>626,299</b>
Nickname:	<b>"Green Mountain State"</b>
State motto:	<b>"Freedom and Unity"</b>
Governor:	<b>Phil Scott (R)</b>
U.S. Senators:	<b>Patrick Leahy (D), Bernie Sanders (Independent)</b>

### How will your state vote?

Predicting a vote is a challenging task. Political researchers have different opinions on how to predict an election outcome. Different formulas and methods are used, however none is perfect. Each prediction is a snapshot of the voters' opinion at a certain point in time. But with election issues and current events changing so fast, it is quite a challenge to have an accurate prediction of how the election will turn out. In the 2016 election, most political pundits and polls before Election Day had Democratic candidate Hillary Clinton in the lead. Yet, while Clinton won the majority of the popular vote, the Republican candidate Donald J. Trump won the Electoral College votes of key swing states and thus the Presidency.

What are the most common predictors to determine how citizens will vote? Socio-economic factors are among the most important ones. They include, but are not limited to, citizens' education, income, and ethnicity. While these are often mentioned as decisive, others are important to consider as well. For example, many Americans cast their vote based on a single issue like health care, women's reproductive rights, the economy, or the environment. These voters choose their preferred candidate based on the issue most important to their identity, their social network, or personal biography, for example religious affiliation, ideology, or health. Americans also often cast their vote in a local context and are influenced by political and social issues affecting their own state. Finally, calculating voter turnout is key to an accurate prediction.

### Some key variables for predicting the election outcome

#### Voting history

*How have people in the state voted in the past? Is the state solidly red, blue, or purple? What is the expected turnout?*

#### Ethnicity

*What ethnic group does a citizen belong to? What is the ethnic make-up of the state?*

#### Religion

*How important is religion to the citizens? How often do they pray or attend worship service?*

#### Economy

*What's the current economic situation in the state? How many citizens live in poverty? How many are without a job?*

#### Income inequality

*How wide is the gap between wealthy and poor people? How much income does the top 1% in the state take home?*

#### Education

*How many people graduate from high school in your state? How many have a college degree?*

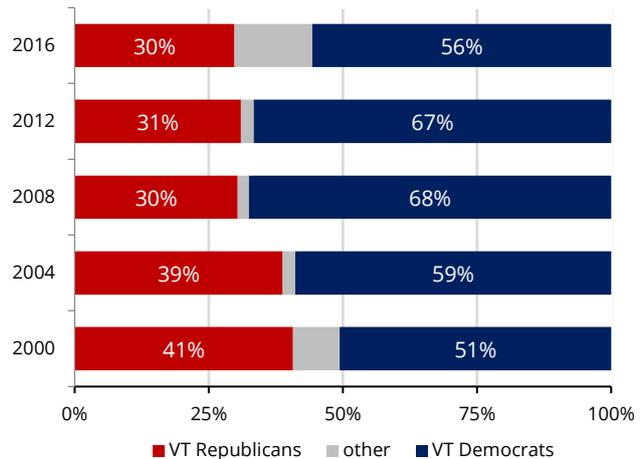

## Voting history <sup>[2]</sup>

Vermont, the first state admitted after the original 13 colonies, joined the Union in March 1791, and has participated in every election since 1792.

While current-day Vermont is reliably Democratic in national elections, it is interesting to note that from the founding of the modern Republican Party in 1854 through the election of 1988, Vermont went Republican in every election except 1964, when it voted for Lyndon Johnson over Barry Goldwater. In 1992, Vermont broke this tradition, voting for Bill Clinton over George Bush, and has been “blue” ever since. In 2016, Hillary Clinton beat Donald Trump by a margin of 56% to 30%, easily winning the state’s three electoral votes.

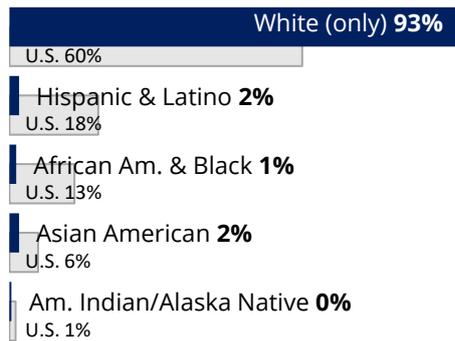

### Election results in Vermont (2000–2016):<sup>[3]</sup>

### Voter turnout 2016:

## Ethnicity <sup>[4]</sup>

(U.S. average in grey)
