

Kilimanjaro kupitia lenzi nyingi

Kilimanjaro through multiple lenses

Uhusiano na mazingira asili. Unajuamazingira asili kama nilivyosema mwanzo, yanatupatia oksijeni... kwasababu yanatupatia kutoka kwenye miti. Kwahiyo, kama unavyoona yalivyo na afya nzuri, ni namna ya afya, ni oksijeni. Pia, ukielekea chini kutoka kwenye haya mazingira asili, hata kwa msaa kadhaa. Utarudi na mawazo tofauti, nina hakika kabisa.

The relation with nature... It provides us oxygen... Because it is given from the trees. And, also if you get to go down to this nature, even some few hours, you come back with different ideas. I am quite sure.

Most guys, who are coming for climbing, they are willing to reach the point. Their dream is to reach that summit. But some fail because of altitude sickness, weather. The arctic weather is so different compared to the geographical position of Mount Kilimanjaro.

Uhusiano wako na mazingira asili
Your relationship with nature

Uzoefu wako wa kukumbukwa zaidi
Your most memorable experience

Kipengele kilicho kizuri na cha kufurahisha zaidi cha mazingira asili
The most pleasant or beautiful aspect of nature

Kivipi mazingira asili yanachangia ustawiubora wa maisha yako
An aspect of how nature contributes to your quality of life

Because of the mist, the rain and the colors of the greens that you can get, and the mystique. It is so lush, old, it is just peaceful, even if it is raining and muddy. It is still squeaky green. It is beautiful, and the mist is really amazing. It creeps through all the trees. It is really cool. And then you see monkeys up there, too. If you are not just looking at your toes. Then you often get to see the monkeys up in the trees. So it is really important to keep looking up.

... ni kwasababu haya vijana wadogo wanaofanya kazi huko mlimani pindi wanaposhuka kutoka mlimani unakuta mzunguko wa pesa ni mkubwa sana kwasababu wananunua vitu vingi hapa kijijini kwetu...

...kwangu mimi naona ni miti iliyoko huko msituni ambayo inachangia sana kupata mvua na hali ya hewa nzuri...

...it is because of these young people who work in the mountain. When they descend from the mountain, money circulation is very high because they can buy many things within the village...

...for my side I see trees in the forest contribute significantly to getting rainfall and good weather...

Kwa sababu ya ukungu na mvua na rangi za kijani ambavyo unapata nah ai ya ugiza na ni ya kifahari na ya zamani na ni ya amani tu, hata sasa mvua inanyesha huko na kuna matope. Bado ni kijani kibichi. Ni nzuri, na hali ya ukungu kwa kweli ni ya kushangaza. Hali ya ukungu inatambaa tu kupitia miti yote. Ni poa sana. Pia, basi unaona tumbili kwa juu. Kama hauangalii kwenye miguu yako, basi mara nyingi unaweza kuwaona tumbili juu ya miti. Kwahiyo, ni muhimu sana kuendelea kuangalia juu ya miti.
