

Tennessee (TN) (11 votes)

Capital: **Nashville**
 Area: **42,143sq mi. / 109,247sq km**
 Population: **7,126,489**
 Nickname: **"Volunteer State"**
 State motto: **"Agriculture and Commerce"**
 Governor: **Bill Lee (R)**
 U.S. Senators: **Bill Hagerty (R),
 Marsha Blackburn (R)**

How will your state vote?

Predicting a vote is a challenging task. Political researchers have different opinions on how to predict an election outcome. Different formulas and methods are used, however none is perfect. Each prediction is a snapshot of the voters' opinion at a certain point in time. But with election issues and current events changing so fast, it is quite a challenge to have an accurate prediction of how the election will turn out. In the 2020 election, most political pundits and polls before Election Day accurately estimated that Democratic candidate Joe Biden would receive more votes than the Republican candidate and former President Donald J. Trump. However, Biden's victory in the Electoral College was narrower than predicted because the polls overstated Biden's support relative to Trump.

What are the most common predictors to determine how citizens will vote? Socio-economic factors are among the most important ones. They include, but are not limited to, citizens' education, income, and ethnicity. While these are often mentioned as decisive, others are important to consider as well. For example, many Americans cast their vote based on a single issue like health care, women's reproductive rights, the economy, or the environment. These voters choose their preferred candidate based on the issue most important to their identity, their social network, or personal biography, for example religious affiliation, ideology, or health. Americans also often cast their vote in a local context and are influenced by political and social issues affecting their own state. Finally, calculating voter turnout is key to an accurate prediction.

Some key variables for predicting the election outcome

Voting history

How have people in the state voted in the past? Is the state solidly red, blue, or purple? What is the expected turnout?

Ethnicity

What ethnic group does a citizen belong to? What is the ethnic make-up of the state?

Religion

How important is religion to the citizens? How often do they pray or attend worship service?

Economy

What's the current economic situation in the state? How many citizens live in poverty? How many are without a job?

Income inequality

How wide is the gap between wealthy and poor people? How much income does the top 1% in the state take home?

Education

How many people graduate from high school in your state? How many have a college degree?

Voting history ^[2]

Tennessee joined the Union as the 16th state in June 1796; it would be the last state admitted during the 18th century.

Tennessee seceded from the Union during the Civil War and did not participate in the 1864 election. Like many southern states, Tennessee voted almost exclusively Democratic from Reconstruction until after World War II. Since the 1950s, Republicans have usually won here, although there have been a few exceptions, most recently Bill Clinton (with home-state Senator Al Gore as vice president) in 1992 and 1996. Interestingly, Gore lost the state in 2000 when he headed the Democratic ticket. In 2020, Donald Trump defeated Joe Biden by 23%, the fifth consecutive double-digit GOP win in what is currently a deep red state.
