 Nickname: **"Capital City", "The District"**
 State motto: **"Justice to all"**
 Mayor: **Muriel Bowser (D)**
 U.S. House: **Eleanor Holmes Norton (D)**

How will your state vote?

Predicting a vote is a challenging task. Political researchers have different opinions on how to predict an election outcome. Different formulas and methods are used, however none is perfect. Each prediction is a snapshot of the voters' opinion at a certain point in time. But with election issues and current events changing so fast, it is quite a challenge to have an accurate prediction of how the election will turn out. In the 2016 election, most political pundits and polls before Election Day had Democratic candidate Hillary Clinton in the lead. Yet, while Clinton won the majority of the popular vote, the Republican candidate Donald J. Trump won the Electoral College votes of key swing states and thus the Presidency.

What are the most common predictors to determine how citizens will vote? Socio-economic factors are among the most important ones. They include, but are not limited to, citizens' education, income, and ethnicity. While these are often mentioned as decisive, others are important to consider as well. For example, many Americans cast their vote based on a single issue like health care, women's reproductive rights, the economy, or the environment. These voters choose their preferred candidate based on the issue most important to their identity, their social network, or personal biography, for example religious affiliation, ideology, or health. Americans also often cast their vote in a local context and are influenced by political and social issues affecting their own state. Finally, calculating voter turnout is key to an accurate prediction.

Some key variables for predicting the election outcome

Voting history

How have people in the state voted in the past? Is the state solidly red, blue, or purple? What is the expected turnout?

Ethnicity

What ethnic group does a citizen belong to? What is the ethnic make-up of the state?

Religion

How important is religion to the citizens? How often do they pray or attend worship service?

Economy

What's the current economic situation in the state? How many citizens live in poverty? How many are without a job?

Income inequality

How wide is the gap between wealthy and poor people? How much income does the top 1% in the state take home?

Education

How many people graduate from high school in your state? How many have a college degree?

Voting history ^[2]

The District of Columbia (D.C.) is the nation's capital.

It has no senators or representatives in Congress. Instead, D.C. sends a delegate to the House of Representatives with essentially no voting privileges. Thus, Washington D.C. is the only non-state to be enfranchised for presidential elections. It gained its three electoral votes through the ratification of the 23rd Amendment in 1961. That amendment gave D.C. a share of electors proportional to its population (like the states), but limited it to no more electors than the least populous state. This meant three electoral votes in 1964, and that number has not changed since. The vote here has always been heavily Democratic; no Republican has ever won an electoral vote. In 2016, Clinton received about 22 votes for each one vote for Trump.

Election results in District of Columbia (2000–

Voter turnout 2016:

Ethnicity ^[4]

(U.S. average in grey)
